These data contain comparisons of MU's tenure stream faculty to the other 81 institutions in our survey cohort, as well as to 5 peer institutions we were allowed to select from our survey cohort. The bars represent the distribution of the cohort scores. The red bar represents the lowest 30% of institutions in the cohort for each benchmark; the gray bar the middle 40%. The green bar represents the top 30% of institutions in the cohort. The open circles represent the mean scores for our 5 peer institutions, while the black diamond is MU's average score. The straight line indicates the cohort median. Peers: University of North Carolina Chapel Hill, Purdue University, University of California Davis, University of Kansas, University of Indiana Bloomington

External comparisons include only tenure stream faculty due to the widely varying types of non-tenure track faculty across different institutions. Additionally, the 2012-13 survey cohort was the first time COACHE offered the option to include tenure track faculty in the survey population. MU opted to include all its full-time faculty, both tenure stream and non-tenure track. We only have internal comparisons for non-tenure track faculty.
